Water Supply Technology

The Water Supply Technology Program will be offering free non-credit courses. These courses are designed to familiarize students with entry-level training in water conservation, treatment, supply, delivery, and waste collection systems. The test review series expose students to the expected Range of Knowledge (ROK) required to pass the State Water Resources Control Board (SWRCB) Distribution, Water Treatment and Wastewater Treatment Operator tests at levels one to five. The courses may also be used to earn Continuing Education Units (CEU) required to renew the certificate or as refresher classes for operators currently in the field.
