

Library Technology A.A. Degree

[A.A. Degree Program Map](#) | [Jump to Program Map](#) ↓

Program Description

The Library Technology Degree equips students for professions in libraries or information management, encompassing modern technology and traditional print media. This curriculum is tailored to prepare individuals for roles as paraprofessionals in various library settings, including public, school, academic, or special libraries, as well as related industries.

About This Pathway

The pathway below represents an efficient and effective course taking sequence for this program. Individual circumstances might require some changes to this pathway. It is always recommended that you **meet with an academic counselor** to develop a personalized educational plan.

Division

Academic Success and Learning Services

Department

Library Technology

Career and Academic Pathway (CAP)

Public Service, Culture, Society

Program Learning Outcomes

1. Utilize the correct technology and media for library services.
2. Classify library materials in a variety of library environments such as schools, specialized, public and academic.
3. Demonstrate the fundamentals of working with the public, and materials management.
4. Describe the purposes, processes, and goals of the different departments within a library, including technical, public, and reference services.
