Why Our Program?

- → **A highly relevant and timely degree** — as water scarcity, flood risk, and climate uncertainty grow, trained professionals are in high demand.
- → **Affordable public option** — a clear, cost-effective pathway to a four-year degree.
- → **Designed for flexibility** — this program uses a cohort model for working professionals, with short-term eight-week courses offered online to accommodate a variety of scheduling needs.
- → **Emphasis on real-world readiness** — includes internships, capstone projects, and fieldwork to connect classroom knowledge with practice.
