STANDARD II

Student Learning Programs and Services

The institution offers high-quality instructional programs, student support services, and library and learning support services that facilitate and demonstrate the achievement of stated learning outcomes. The institution provides an environment that supports learning, enhances student understanding and appreciation of diversity, and encourages personal and civic responsibility as well as intellectual, aesthetic, and personal development for all of its students.
Standard II: Student Learning Programs and Services
The institution offers high-quality instructional programs, student support services, and library and learning support services that facilitate and demonstrate the achievement of stated student learning outcomes. The institution provides an environment that supports learning, enhances student understanding and appreciation of diversity, and encourages personal and civic responsibility as well as intellectual, aesthetic, and personal development for all of its students.

IIIC. Library and Learning Support Services
Library and other learning support services for students are sufficient to support the institution’s instructional programs and intellectual, aesthetic, and cultural activities in whatever format and wherever they are offered. Such services include library services and collections, tutoring, learning centers, computer laboratories, and learning technology development and training. The institution provides access and training to students so that library and other learning support services may be used effectively and efficiently. The institution systematically assesses these services using student learning outcomes, faculty input, and other appropriate measures in order to improve the effectiveness of the services.

Descriptive Summary
The Library and Learning Support Services Division has undergone many changes in the past five years intermittently supervising a variety of instructional campus programs including RTVF, Paralegal, and Middle College High School. At the time of the campus reorganization in the 2010-11 academic year, the Library Division was transferred to Student Services to balance out the vice presidential workload more equitably. Collegial processes were observed during the 2010-11 reorganization. As part of Student Services the division dean supervised a variety of campus services including Financial Aid, EOPS, Student Life, DSP&S, and Student Health Services. The Division lost some staff and departments that had traditionally been a part of it: Tutoring and the Tutorial Coordinator was reassigned and now report to the Math, Business, and Computer Technology Division. The Audiovisual Department, two Media Specialists, Network Specialist, and one Library Computer Technician were assigned to the newly formed Campus Technology Services.

The Division itself was dissolved at the end of academic year 2013-14 during the Student Services reorganization when the dean’s position was eliminated. The Student Services reorganization in 2013-14 did not follow the collegial processes used in 2010-11. The campus administration first cited the decision as confidential, personnel matters, but then as a budget savings measure, yet the reasons for dissolution of the Library and Learning Resources Division and elimination and/or reclassification of management positions in Student Life, DSPS, Financial Aid, Admissions and District remain unclear. The Library will be under the supervision of a Library Director who will report to the Vice President of Student Services. The Director’s position was unfilled during the 2013/2014 academic year. The Library continues to supervise the Academic Advancement Department and the Library Technology Program, both of which have remained in the division/department throughout the many changes.

The 40,000 square-foot Library was the first of the new buildings constructed in the major reconstruction project of SBVC in this century. San Bernardino Valley College Library & Computer Lab houses in excess of 70,000 print books, plus 100 current periodical subscriptions, and 41 periodical and newspaper titles in microfilm. The Library has reinstated Chat Reference
Services (Question Point), and offers 40 electronic databases that connect to library resources on-and-off campus.

The Library Computer Lab houses 104 computers for student use with an additional 37 stations available in the Library Reference area. The Library is open 6 days a week for a total of 61 service hours. The Library’s collection supports the wide variety of programs available at SBVC and contains two classrooms for instructional use with one equipped with 31 computer stations for use to teach online research skills, and the other for Academic Advancement and Library Technology Program classes.

Learning Support Services on campus that report to Instructional Divisions include: Computer Information Technology Lab, Health Science and Nursing Resource Center (Skills Lab), Math Tutoring Drop-In, Reading Lab and Open Use Computer Lab (with limited services), Student Success & STEM Center, Technical Learning Center, Supplemental Instruction (SI), Technical Division Learning Center, and the Writing Center. Support services that report to the Student Services Division include the Disabled Student Programs & Services High Tec Center (DSP&S) accessible computer lab, STAR/TRIO and the EOPS/Care computer lab. Additionally, there is an open computer lab available in Student Life, called the Cyber Lounge, and a Mini Computer Lab in ADSS102.

SBVC Library and campus Learning Support Services have established processes for the continuing and ongoing gathering of assessment of SAOs/SLOs data along with an established schedule for active assessment.

**II.C.1. The institution supports the quality of its instructional programs by providing library and other learning support services that are sufficient in quantity, currency, depth, and variety to facilitate educational offerings, regardless of location or means of delivery.**

**Descriptive Summary**

Learning Support Services provided by the Library and the campus Learning Support Services departments reflect the institution’s commitment to academic achievement by offering a variety of programs and services which support student success. The Library’s collection includes books, periodicals, microfilm, reference materials, e-books and online databases, all selected and coordinated to meet the varied needs of the current diverse student population as well as to provide the opportunity for lifelong learning for the campus community (5.1). In addition to these materials, the Library furnishes students with 104 computer workstations in the Library Computer Lab, including some equipped with adaptive software supplied through a partnership between the Library and Disabled Students Programs and Services (DSP&S). This provision supports the strategic initiatives of access and student success.

Another library service provided to the campus is the availability of customizable bibliographic instruction (BI) sessions and open workshops taught by faculty librarians. In addition, the librarians have created several extremely popular, topic-specific “How-To” brochures which guide students through various research and study problems from beginning library research to writing an outline (5.3). Perhaps the most popular library service offered is individual research assistance by library faculty, available 61 hours per week. Online reference assistance specific to the needs of the online student has greatly expanded with the e-mail the librarian service (5.4), which enables students to email specific questions to campus librarians for help.
Additionally chat reference service from Question Point or “24/7 reference” service allows students to receive help from academic reference librarians via computer 24 hours a day, seven days a week. Credo Reference e-books mirror in-part the print Reference collection, are available for online student use. In addition, beginning fall 2013, a collection of over 100,000 e-books was added supporting all classes taught at the campus.

The library has licensed 30 reference databases (5.5) and a number of software programs for student research, made available on 37 dedicated computers in the Reference area, and also on all the computers in the Library Computer Lab. In addition, the databases are accessible remotely via password for currently enrolled students. Included are such specialized resources as the EBSCO Professional and Vocational database, which supports career and technical education, and the Ethnic Newswatch database, which meets the diverse interests of the student population (5.6). Skill building databases supported by the Basic Skills Committee (Learning Express and English Language Learner –ELL) have enhanced the library databases collection beginning in July 2013. Currency of learning materials is maintained through daily updates to the database by the vendor.

Campus staff also utilizes the Library’s historic archival collection. For example, when organizing the anniversary celebration of the college the committee was able to use images from the large historical photo archive. Additionally, in January of 2010, the California Community College Board of Governors asked member colleges to work on the California Nisei College Diploma Project that recognized Japanese students who, during World War II, were taken from their homes and classes and interned. The campus Director of Marketing & Public Relations requested the librarian’s help in researching these students who then were recognized and awarded a degree. Retired professor and local history author Roger Schmidt, and his co-author Harry Carson Frye, acknowledged the assistance of the library’s Circulation Supervisor Angie Gideon and librarian Patti Wall when their latest book was published in 2011 titled, “The Blue and Grey: San Bernardino Valley College Sports 1926-2011”. The book is available in the Library on the second floor, call number GV691 .B658 S36 2011

Librarians continue to expand their service to the campus by engaging in partnerships with departments and services. Embedded librarianship, or partnership, has been practiced on this campus for some time within the disciplines of Nursing, Psych Tech and English, where the faculty librarians have tailored specific library services for their students [Evidence, PPTs]. As “gateways to information” to accessing the overwhelming amounts of information available at the touch of a smart phone, iPad or computer, the embedded librarian is a partner in the student’s success at SBVC. Last year a faculty librarian provided point-of-need instruction to students working on academic assignments in the Veteran’s Resource Center [Evidence] and Supplemental Instruction [Evidence]. This innovative expansion to the standard role of research expert and inclusion as an integral part of the learning experience has proven advantageous to all. Embedded Librarian services are a natural extension of how services are currently provided within the library walls: class instruction; one-on-one reference service; and research workshops. The goal is to explore new ways to assist and provide pathways for student success through additional partnerships.

Learning Support Services on campus include [Evidence: Rose’s one-sheet]:

- Student Success Center provides tutoring, workshops, and support for students currently enrolled in all disciplines. In addition, a collection of skeleton bones that are needed for
participation in the anatomy courses are housed in the math and science Student Success Center.

- The Writing Center which assists students in all courses by developing strong writing skills and in preparing quality, college-level written assignments.
- The Reading Lab provides specific tutoring and resources for students currently enrolled in Reading classes.
- The Technical Learning Center assists students with the acquisition and development of computer skills, basic skills, and learning skills necessary for technical trades. This level of service varies based on the availability of staff.
- The Business Division computer lab provides assistance on computer stations for students in computer information technology courses.
- The Health Science/Nursing Resource Center (Skills Lab) assists students in the nursing, psychiatric technician and pharmacy technician program.
- The math tutoring drop-in services, located in the Student Success Center provides peer tutors to prepare students currently enrolled in math classes for upcoming assignments and exams.
- The Science, Technology, Engineering and Math (STEM) Program located in the Student Success Center is a resource that offers workshops and drop-in tutoring for sciences and all math courses, as well as scheduled course specific workshops.
- The STAR/Trio Grant and DSP&S offices provide assistance for students within their programs.

The SBVC Library and campus learning support services faculty and staff are dedicated to the development, implementation and assessment of service area outcomes (SAOs) in all operations and practices. All library departments evaluated SAOs in 2012 and Spring 2014. The SBVC Library continues to collect data every semester. SLOs for Academic Advancement have been assessed in 2009, 2010, and 2012. The results are viewable on the Vice President of Instruction’s webpage.

Learning Support Services attached to instructional departments such as the Student Success Center, Reading Lab and Writing Center assess SLOs within those departments.

Self-Evaluation
The institution meets the standard. The campus offers a wide variety of Learning Support Services. The Library collection has the depth and breadth to support campus curriculum. A Library faculty member traditionally sits on the Curriculum Committee to ensure that classroom needs are met by the Library. Library materials and faculty services are offered in a variety of formats and easily accessible to DE students.

Actionable Improvement Plan
None
II.C.1.a. Relying on appropriate expertise of faculty, including librarians and other learning support services professionals, the institution selects and maintains educational equipment and materials to support student learning and enhance the achievement of the mission of the institution.

Descriptive Summary
Skilled library faculty selects quality materials to develop a collection suitable in depth and breadth for the campus curriculum. The educational materials in the library collection are all selected and coordinated to meet the varied needs of the current diverse student population as well as to provide the opportunity for lifelong learning for the campus community (5.1). The library’s collection includes books, periodicals, microfilm, reference materials, e-books and online databases, all selected and coordinated to meet the varied needs of the current diverse student population as well as to provide the opportunity for lifelong learning for the campus community (5.1). In addition to these materials, the library furnishes students with 104 computer workstations in the Library Computer Lab, including some equipped with adaptive software supplied through a partnership between the library and Disabled Students Programs and Services (DSP&S). This provision supports the strategic initiatives of access and student success.

The SBVC library maintains a variety of print materials, online databases and computer resources for student learning. The print collection includes more than 70,000 books, 100 current periodical subscriptions, and 350 total periodicals (some of which, although not current subscriptions, are still available for research and reference). A Collection Age report is generated on the library’s print titles demonstrated that it is a balanced, current, and growing collection. A snapshot of the collection as a whole shows that although more than 18% of the collection has been published in the past 18 years, it nevertheless retains historical depth and context, with 20% of the collection published prior to 1950. Due to the increased cost of print materials and the reduction in the library budget, the library has added an e-book collection to maintain currency. EBSCO Academic e-books contain over 121,000 titles on a wide variety of subjects. Credo Reference Academic Core e-book collection provides a wide variety of reference material, images and audio files.

Library faculty uses a number of resources to ensure the quality of the library. The campus mission, strategic plan and library mission are at the forefront of ensuring quality library services. Library faculty evaluates the collection for currency, depth and variety as prescribed by the American Library Association in its standards for best practices for library services to undergraduates. Librarians use professional publications such as Library Journal, Kirkus Reviews, and Resources for College Libraries to maintain currency in the field and guide collection development.

Librarians work in cooperation with other faculty in their areas of specialization to make the best selections for course-related materials. Faculty may communicate their recommendations via email, on the phone or by submitting the New Book Request form to the Library. This form is available at the library website and enables students and faculty the opportunity to submit requests [Evidence: Form; Examples of books purchased].

In April, 2008, the campus Diversity and Equity Committee worked in conjunction with the faculty librarians to provide $3,000 for purchases of culturally diverse books and videos for the library collection. In the spring semester of 2011, the library received a special budget for class related books and successfully worked directly with the faculty department heads on a short
timeline, to great success. Multiple copies of many routinely required reading books were added to the collection. On occasion, when grant or surplus funds are identified for the purchase of additional library materials, the faculty librarians do further outreach to the instructional faculty for recommendations to assure that the most relevant materials are purchased.

The diversity of the library's databases collections meets the needs of students who are preparing for degree/transfer to 4-year institutions, and of students who are completing vocational and technical certificates. In light of the 100% reduction of (Telecommunications and Technology Infrastructure Program (TTIP) funding for online library resources, the library faculty have carefully charted the use and the expenditures for these reference databases (5.10). In 2012/2013 librarians were able to restructure database purchases to offer specialized databases, including much needed scientific databases and English Language Learner (ELL) for basic skills without increasing costs. In addition, the databases are accessible remotely via password for currently enrolled students. Included are such specialized resources as the EBSCO Professional and Vocational database, which supports career and technical education, and the Ethnic Newswatch database, which meets the diverse interests of the student population (5.6). Skill building databases supported by the Basic Skills Committee (Learning Express and English Language Learner –ELL) have enhanced the library database collection beginning in 2013. Currency of learning materials is maintained through daily updates to the database by the vendor. When database funding was reduced unexpectedly again in July 2012 statistical usage data was used to determine what databases and services to cancel (Ethnic Newswatch & Chat Reference) and what database packages to reduce. The cancelled databases and services were restored in 2013/2014 due in part to the Basic Skills Committee funding.

The library maintains a collection of textbooks and reserve materials to support campus curriculum. In 2012-2013, 77% of the library materials circulated was from the reserve collection. By providing access to textbooks, students who cannot afford textbooks are able to learn, achieve, and meet learning outcomes in their classes. Associated Student Government has been funding an additional $10,000.00 each year and plans to increase these funds in 2014-2015 with an additional $5,000.00.

The library has many services available 24/7 for off-campus students including the Big Bear location. 24/7 Chat Reference, and remote access to all library online databases are available with passwords. Remote access to the Library databases enables students to locate, view, print, email and download an enormous assortment of academic journals, general magazines, newspapers, e-books and government document materials. Additionally students may talk to the librarian by phone during hours of operation as well as through Chat Reference services.

The library has licensed 30 reference databases (5.5) and a number of software programs for student research, made available on 37 dedicated computers in the Reference area, and also on all the computers in the Library Computer Lab.

**Self-Evaluation**

The institution meets the standard. Librarians attend professional conferences, review online professional resources, and read library literature to stay current in their field. Faculty and staff in the Library and Learning Support Services department are active members of professional associations, such as the California Academic and Research Librarians association, the Southern California Instruction Librarians group, the California Library Association, and the
American Library Association, and attend informational seminars and technology conferences, such as those offered by the Community College League of California.

Library faculty and staff assessed the collection by performing a physical inventory and shelf count during Summer 2011. This process allowed faculty and staff to ascertain if volumes were missing or miss-shelved. Hand-on work with the entire collection aid faculty librarian in determining what areas of the collection need to be weeded or grown. All library faculty are assigned subject areas within the collection that they are responsible for weeding.

Additionally, library faculty and staff make note of unmet student needs and purchase in order to fulfill any gaps in the library collection. Student and faculty requests are also considered for purchase. Library faculty are traditionally a part of the Curriculum Committee and thereby aware of the information needs across campus. Specifically, a librarian participates in the Technical Review portion of the curriculum process and must sign off in CurricUNET that the library has adequate material to support a class’s curriculum.

The library uses evaluative surveys to determine if SAOs are being met. These same surveys also inquire if students find the library instruction, services and materials valuable to their education attainment across the curriculum.

The faculty librarians provide open workshops BVC students each semester. An example of a workshop topic is basic research skills which include looking up a book in the Library catalog; a simple keyword search using databases; another example is the use of more critical thinking topics like evaluating Internet resources and advanced database research techniques for scholarly journals. During 2011-2012 academic year there were 6 workshops given each semester with a total of 12 that year. Each workshop ends with an evaluation tool where students rate the effectiveness of the information they have been given, if they found it helpful, and if they have been invited to return for additional help from a librarian. In 2011-2012 academic year there were 371 students who participated in the workshops [Evidence: Statistics].

Also in 2011-2012 we implemented the One-Minute Reference Assessment in the Reference area. A box was set up with a short anonymous evaluation form for student feedback. We received 81 total responses to our evaluations that reflected student satisfaction [Evidence: Sample of results].

Librarians conducted an informal survey of students during Fall 2012 while they waited for the library to open. The survey indicated that 58% of students were there to check out a computer; 54% were waiting to check out a textbook; 49% of students needed library services and/or assistance from the library faculty [Evidence PPT Presentation for Student Gov’t; Academic Senate and College Council]. These results are aligned with the results of the Library Snap Shot Day survey conducted in 2010 [Evidence Snap Shot Day results]
Below are the results from the annual Student and Faculty Campus Climate Surveys.

The books, magazines, and databases available in the library are adequate to complete my assignments.
269 (37.3%) Strongly Agree; 296 (41.0%) Agree; 22 (3.0%) Disagree; 13 (1.8%) Strongly Disagree; 96 (13.3%) No Opinion.

The library collection of books, periodicals, and databases is adequate to meet the needs of my students.
11 (15.7%) Strongly Agree; 31 (44.3%) Agree; 11 (15.7%) Disagree; 3 (4.3%) Strongly Disagree; 14 (20.0%) No Opinion.

Results from the SNAPSHOT Day, Oct. 14, 2010, in the Library and Library Lab

Number of students who responded to SNAPSHOT checklist questions at the Library and Library Lab:
Use Reference Databases--225
Looking for Books--142
Reserve Materials--149
Use Computers--382
Use study rooms--101
Meet friends/classmates--154
Quiet study--305
Use WiFi--76
View a movie--33
Use a magazine--59
Special collections--18
Program/Workshop--86
Library Card--70
Pay fines--25

Number of People Counted Hourly:
Library--2396 total people or 200 people per hour
Circulation Checkouts--total for day for Library, Library Lab, and AcAd--1515
Circulating books—132
Library Computer Lab--728
AcAd Lab--235
Reserves--420

Number of student contacts of 5-minutes or longer with a Librarian (not including ready-reference, registration, FAFSA or directional) –106

Total number of laptops for the day counted hourly--144

SAMPLE COMMENTS
"The Library is a place to study, a place to find out information, and just a place of quiet from this hectic world."
"The library staff is very welcoming and polite to us students."
"Our library is an important resource center. Vital for our education."
"Need more space for quiet studying on lower level."
"Needs to be open earlier like at 7:00 a.m."
"I love the library."

Please tell us why you came to the library today:
"To rent a computer."
"Open the library earlier."
"Please consider opening the Library on Saturdays again. At least every other Saturday."
"The library is important to me because it has many books that I need for class (like math books). I also can study in peace or do some research." "I came to use the math book for my homework and use the computers."
"Everything I'm doing can only have been done with the use of our library." "Need library open longer and on weekends."
"Everyone that works in here are great! Willing to help:)"
"The library is important to me because all of its resource, I need it for each one of my classes, books used, computers and copy machines."
"A library is our second brain...it helps us to think and download information!"

**August 29, 2012 Survey of Library Services conducted by the Library Faculty**

Students participating: 138

Each survey included 18 services common to the library and students could select all services that applied to them. Results: Students selected 688 services or an average of 2.8 services per survey.

Survey Results:
- Library and Library Faculty Services—49%
- Using the Library Computer Lab—36%
- Other Library Services—15%

Outcomes: The Library serves students who need access to the resources, materials and faculty in the Library.

Research has shown a positive relationship between library use and student persistence and achievement according to the Standards of Practice for California Community College Library Faculty and Programs [http://asccc.org/sites/default/files/Library-paper-fall2011.pdf](http://asccc.org/sites/default/files/Library-paper-fall2011.pdf). Additionally, examining both basic skills and non-basic skills students over multiple years, researchers discovered that use of library resources, including books, media, periodicals, and computers, resulted in increases of persistence around 11% and success around 7% for both groups.

TTIP had been used to support the library’s collection, databases, and software. The district and the college are working together to provide funding for some library needs that are also shared with Crafton Hills College including the new library management system, OCLC-World Share (WMS), which was implemented in fall 2013. The Library and Learning Resources area have received highly ranked prioritizations in program review. When money is available, the president attempts to fund those items on the program review list.

**Actionable Improvement Plan**

None
II.C.1.b. The institution provides ongoing instruction for users of library and other learning support services so that students are able to develop skills in information competency.

Campus Core Competency 2 addresses Information Literacy. Library faculty and staff all have a role in teaching students these competencies.

2.1: Find and Interpret Information
2.2: Evaluate the authority and bias of information
2.3: Utilize technology to organize and present information
2.4: Demonstrate knowledge of basic computer functions

The main goal of library faculty is to help students learn how to find, interpret and evaluate information. Librarians accomplish this through a variety of methods including class Bibliographic Instructions, open workshops, one-on-one reference interactions, reference appointments and 24/7 chat reference.

Library faculty and computer lab staff provides point of need instruction on basic computer, printer and copies functions as well as software and online utilities to organize and present information.

Librarians create and maintain handouts of MLA & APA citation styles used to present and organize information in essays, speeches and research papers. They provide point of need instruction on the use of these citation styles.

The information skills addressed in Core Competency 2 are supported by many discipline specific labs, tutoring and supplemental instruction including The Technical Learning Center, The Business Division computer lab, The Health Science/Nursing Resource Center, Student Success Center, STAR/Trio Grand and DSP&S. These areas serve students at their point of need.

Core Competency 1: Communication is supported by The Writing Center which assists students in all courses with developing strong writing skills and in preparing quality, college-level written assignments and the Reading Lab which provides specific tutoring and resources for students currently enrolled in reading classes.

The Academic Advancement and Student Development Departments provide courses that provide instruction in strategies for student success through ACAD 001 classes offered each semester. The college provides a variety of tutoring programs to increase the retention, the successful course completion, and completion of degrees and certificates (5.7).

In order to provide the best services to students, the Library and Student Support Services department continues to develop evaluative tools as part of the campus wide effort to systematically assess the effectiveness of services. Currently, librarians give research assignments to students during BI (bibliographic instruction) sessions to reinforce library research skills demonstrated during the instruction. Some methods of assessment have included that the librarians email a brief survey to faculty members as an assessment and to gather feedback for making improvements. Because of this data gathering and analysis, new developments and improvements to the BI curriculum have resulted in increased services to support student learning outcomes, which have in turn increased the number of faculty who
bring their students to the library to learn to do college-level research. Evidence of this can be seen in a 61.5% increase in the number of BI sessions over the last ten years, and a 23% increase in the overall number of BI sessions given over the last three years in the new library facility. By and large, classroom faculty finds the Library and Learning Support Services to be meeting the needs of the student population.

The faculty librarians provide SBVC students workshops each semester on such topics as basic research skills, including looking up a book in the Library catalog; using a simple keyword search using databases; and more critical thinking topics like evaluating Internet resources and advanced database research techniques for scholarly journals. During 2011-2012 academic year there were 6 workshops given each semester with a total of 12 that year. Each workshop ends with an evaluation tool where students rate the effectiveness of the information they have been given, if they found it helpful, and if they have been invited to return for additional help from a librarian. In 2011-2012 academic year there were 371 students who participated in the workshops.

Library Snapshot Day Fall 2010, the Fall 12 Survey, and ‘Why I Love the Library’ Week provide quantitative and qualitative feedback from student about the services they use and how the library is meeting their needs.

The Student Success Center took an innovative approach to assessing core competencies. Tutors observe when the students they interact worked on core competency skills. Tutors then map the student/tutor interactions to the core competency grid. The core competency data was then tabulated by course and department. The data will be provided to departments for their own analysis. The data will be supplied at a campus wide level and used to evaluate core competencies, including information competencies.

At one time the SBVC Library’s website offered a Web-based library orientation that included library regulations, procedures and policies, a guide on using the online catalog, instructions on using the *Reader’s Guide to Periodical Literature* and reference databases, and access to copies of the Library Research Assignment. Students may orient themselves to the library facilities by taking an online virtual tour. Changes in technology have made the *Reader’s Guide to Periodical Literature*, a print resource, obsolete for DE/CE students. Thus, librarians have expanded the Tutorials and Guides section of the library web page providing links to tutorials on search strategies and the use of our individual databases, online catalog, APA and MLA citation styles and yes, *Reader’s Guide to Periodical Literature* for those student who still prefer print. By providing these links student always have access to the most up-to-date tutorials and enhancements from our database providers. DE student may also utilize 24/7 Chat Reference services or E-mail the Librarian. The Writing Lab and Student Success Center offer online services for tutoring.

**Self-Evaluation**
The institution meets the standard. The Library and other student support services offer a variety of services to support student learning. Services are available to student on campus and to students in DE courses. A variety of methodologies are used to assess information competencies and services.

**Actionable Improvement Plan**
Incorporate Student Success Center core competency data for campus wide analysis and dialogue on core competencies.
II.C.1.c. The Institution provides students and personnel responsible for student learning programs and services adequate access to the library and other learning support services, regardless of their location or means of delivery.

In 2007 the library was open 74 hours a week, including Saturdays, during the Fall & Spring Semesters plus provided access to two fully staffed computer labs one in the library and one in the Liberal Arts building. Attrition and transfer of support staff that worked with students, namely five Library Media Clerks and Computer Technician positions, have had a serious impact on library hours and services. The library no longer operates a fully staffed computer lab in the Liberal Arts building.

Library hours diminished over several academic years. In Fall 2010 the Library was open 57 hours a week, closed on Saturdays. Fall 2011, the Library closed ½ day on Fridays limiting hours to 52 hours a week.

The Library opened Fall 2012 with only 39 hours a week on a staggered schedule in an attempt to accommodate day and evening students. Students and faculty across campus advocated for an increase in library hours. Students presented a petition to the Board of Trustees and the Academic Senate presented a resolution. Library hours were restored by the middle of the Fall Semester [Board Minutes; Senate Minutes; Senate Resolution]. The Library hours have been stabilized at 61 hours a week, including four hours on Saturdays, for several semesters. However the increase in hours has not been due to hiring sufficient staff to operate the library, but by paying voluntary overtime to current staff members to work evenings and Saturdays.

Current hours of operation during the Fall and Spring semesters to provide access to the library and library computer lab resources. Monday through Thursday, the Library is open from 8:00 a.m. to 8:00 p.m., Friday 8:00 a.m. – 5:00 p.m. and Saturday from 10:00 a.m. – 2:00 p.m.

The library is closed on Sundays. Between sessions and holidays, the library is open 40 hours per week and hours are posted on the physical building and on the Library home page.

The Library is staffed by 4 FT faculty librarians; 2 FT Library Media Clerks and 2 FT Library Computer Technicians, 1 FT Librarian Technician 2, and 1 FT Library Technician 1.

Library online resources can be accessed from any computer lab on campus and from anywhere in the world via the Internet. Library computers include accessibility software. A scanner is available in the library for books that cannot be checked out. The introduction of Credo Reference and EBSCO Academic e-books has given students access to resources formerly only available in print. Reference services are available 24/7. Electronic resources are available to students 24/7 with the exception of vendor scheduled maintenance periods

Student Success Center office hours are Monday through Friday, 8:00 a.m. to 5:00 p.m. During these hours students may enroll in tutoring, schedule appointments, and address administrative issues. Peer tutoring hours vary based on tutor availability and expressed student need. In the past semesters, tutoring has been available Monday through Thursday from 8:00 a.m. to 8:00 p.m. and Friday and Saturday, from 8:00 a.m. to 4:30 p.m. The other tutoring service centers post hours of service based on availability (5.1).
Instructional Divisions Include:

Computer Information Tech Lab (Business Building): The newly appointed Dean (Spring 2014) is evaluating how this lab can best be used. [Evidence: Corrina called Henry]

Health Science and Nursing Resource Center (Skills Lab): Students enrolled in the Nursing, Psychiatric Technology or Pharmacy Technology Program can access tutoring services provided by this resource center. Lab hours vary each semester; students should check with their instructors or with the Nursing Department for the current semester hours. Current student identification verification is required to utilize these services. There is no charge for lab usage.

Math Tutoring Drop-In: Math tutors are available for all levels of Mathematics coursework. Service is available on a drop-in basis, no appointment is necessary for these services. Students should always bring current student identification verification. There are no charges for these services.

Reading Lab and Open Use Computer Lab: Provides one-on-one tutoring; workshops; instructional print material; reading software; general assessments using standardized reading tests. The lab is open 8:00 a.m.-4:30 p.m., Monday through Friday. The Open Use Computer Lab is available to currently enrolled students for independent computer use Monday through Thursday. Printing is not available.

Open Use Computer Lab: The Open Use Computer Lab is open Mondays through Fridays 8:00 am to 4:30 pm. and is available for independent computer users Monday through Thursday.

Science, Technology, Engineering & Mathematics (STEM) Program is housed in the Student Success Center. This resource offers workshops and drop-in tutoring for all science and math courses. It also offers specific workshops which are offered throughout the semester. Times and subjects are posted on the website.

Student Success Center (SSC): The Student Success Center administrative hours are Monday through Thursday, 8:00 a.m. to 8:00 p.m., Friday, 8:00 a.m.-6:00 p.m., and Saturday, 9:00 a.m. until 2:00 p.m. The mission of SSC is to empower students to benefit from their educational experience. Tutors help students to become comfortable with course material and help develop the learning strategies, confidence, and skills needed to become independent learners. Scheduling an appointment at the SSC is not complicated and can be done online. Tutors provide individual one-on-one, small group, topic specific facilitated workshops, and supplemental instruction sessions.

Star/Trio: Success Through Achievement and Retention: The goal of STAR, a TRIO Student Support Services program federally funded by the Department of Education, is to increase the college retention and graduation rates of its participants, and facilitate the process of
transferring to a four year university. This is done by providing tutoring, counseling, transfer advising and dedicated staff that focus on helping students meet their educational needs in a positive supportive setting. [www.valleycollege.edu/student-services/specialized-services/success-through-achievement](http://www.valleycollege.edu/student-services/specialized-services/success-through-achievement).

Supplemental Instruction (SI): Supplemental Instruction or SI is a voluntary academic assistance program that utilizes peer-led group study to help students succeed in traditionally difficult courses—those with high unsuccessful completion rates (Ds, Fs, Ws, and NCs). SI targets tough courses that over time have demonstrated their difficulty regardless of the faculty who teach them or the material that is used. The SI model, originally funded through the HSI STEM PASS/GO grant, is now being implemented in other disciplines as part of the Learning Compass Program. The Learning Compass SI housed in the Library. [http://www.valleycollege.edu/student-services/tutoring-academic-support/student-success-center/supplemental-instruction-sessions](http://www.valleycollege.edu/student-services/tutoring-academic-support/student-success-center/supplemental-instruction-sessions)

Technical Division Learning Center: This learning center supports students in the Technical Division and functions as a study hall.

The Writing Center: located in the Liberal Arts Building, room 201, helps students at all levels and from all disciplines to improve their writing. The center houses an experienced staff of writing tutors who are available for one-on-one writing conferences with students. The Writing Center offers on-line tutoring to assist students in 100 level classes and above. In addition, the center offers a variety of workshops throughout the year that focus on various aspects of the English language, such as on pronunciation, grammar and components of the writing process. [http://www.valleycollege.edu/student-services/tutoring-academic-support/writing-center](http://www.valleycollege.edu/student-services/tutoring-academic-support/writing-center)

Student Services includes:

DSP&S--High Tech Lab: This program is designed to meet the needs of temporarily and permanently disabled students. Disabled Student Programs and Services (DSPS) office is open Monday through Friday, 8:00 a.m.-4:30 p.m., and can provide a variety of services to enable students with disabilities to function independently in an educational environment. DSP&S provides counselors and an educational advisor to assist students. [http://www.valleycollege.edu/student-services/specialized-services/disability-services.aspx](http://www.valleycollege.edu/student-services/specialized-services/disability-services.aspx)

DSP&S can contact publishers for an electronic copy of a textbook and convert the file for use by students with visual impairments.

EOPS/CARE: Extended Opportunity Programs and Services (EOP&S), is a state funded program designed to encourage the enrollment, retention, and transfer of students challenged by language, social, economic, and educational disadvantages, and to facilitate the successful completion of their goals and objectives in college. [http://www.valleycollege.edu/student-services/specialized-services/eops-care](http://www.valleycollege.edu/student-services/specialized-services/eops-care)

Student Life-The Cyber Lounge: Currently registered students may use computers located in the student center room CC 140 to check their email; update their Face-book accounts; do homework or simply relax playing on line games in the Associated Student Government sponsored cyber lounge. [http://www.valleycollege.edu/current-students/student-life/student-resources/Cyber_Lounge](http://www.valleycollege.edu/current-students/student-life/student-resources/Cyber_Lounge)
Welcome Center/Mini Lab (In the Administration Building near Counseling): Located near Counseling, the Mini Lab hours vary and support potential students with access to FAFSA and WebAdvisor.

Self-Evaluation
The campus meets this standard. The campus provides services to DE students. Library services are available to students regardless of location and means of delivery. The Writing Lab and Student Success Center offer support to students online. On campus hours of access to library, DSPS, tutoring and other learning services are limited because of inadequate staffing. Library and learning support services are limited on Saturdays and unavailable on Sundays. Long lines often greet students during hours of operation.

Actionable Improvement Plan
Library has conducted a usage study in Spring 14 by getting a physical count of students in the building. Use of library materials is not an accurate measure of number of students served as many students enter the library for research and study purposes without checking out materials. Library faculty will analyze library usage patterns in Fall 2014 to determine optimal hours of operation and service levels.

II.C.1.d. The institution provides effective maintenance and security for its library and other learning support services.

Descriptive Summary
Thieves and vandalism of library materials and equipment is always a concern. To prevent theft of printed materials, collections have “tattle tape”, or safety strips that set off an alarm at the primary entrance/exit to the library. Computers are locked down and campus security provides a patrol for ensuring the safety of resource materials and students alike. Faculty and staff are alert for vandalism and/or misuse of library materials.

Maintenance of library materials and equipment takes place in several ways. Care and repair services for the print resources are provided by qualified library staff to preserve the collection. Ongoing shelf maintenance and weeding the library’s print collection keeps the collection organized and relevant. A count of the entire print collection took place during June of 2010. A physical inventory of books with call numbers beginning A – N also took place in summer 2010. Inventory of books with call numbers beginning P – Z took place in summer 2011.

Maintenance of the computer systems in the library and across campus is provided by Campus Technology Services. Computers are protected with Deep Freeze software and physically secured with computer locks.

Security and maintenance of the library facility includes several different challenges, such as appropriate lighting, the upkeep of materials, and the security of resources. Library and custodial staff work hard to keep the facility in the best shape for student use. The library building includes an 80-seat-capacity viewing room with a separate entrance where a physical gate locks into place during the closed hours of the library, thus providing an added level of safety for the library collections.

Libraries have important collections that can fall prey to interested parties. The use of “tattle tape,” or security strips (that activates an alarm when materials are not properly checked out) on all new resources as they are added to the collection, proves a major deterrence to theft.
Safety is a concern in the library. Service desks throughout the library are equipped with “panic buttons” that are connected to campus police during day hours and the county sheriff’s office during evenings and Saturday. The second floor of the library is unstaffed. Flashlights and a copy of the Campus Emergency Procedures are located in each department throughout the library. In Spring 2008, additional earthquake bars were installed in the library reference and reserve sections, areas that were not included in the initial new building design. Since that time, each year the library participates in an annual safety drill and during the Great California Shake Out.

The Library Computer Lab has a high volume of computer usage. This unrestricted exposure of the network sometimes brings intentional or unintentional threats to the system. The network specialists have been responsive in the early detection and an immediate reaction to threats that are posed to these systems.

In case of an emergency evacuation or elevator lockdown a transport chair for the mobility impaired is located on the second floor. Flashlights and a copy of the Campus Emergency Procedures are located in each department throughout the campus. Every semester, a campus practice drill is conducted, which includes the evacuation of the library.

Self-Evaluation
The institution meets the standard. SBVC is very attentive to the safety of students and employees. Campus Security routinely patrols areas where there could be security risks. Security responds promptly to medical or security concerns. Service desks throughout the library and in other learning support offices are equipped with “panic buttons” that are connected to campus police during day hours and the county sheriff’s office during evenings and Saturday.

The Library is equipped for emergencies. The library was the first of the new buildings on campus with state-of-the-art building materials were used to make it earthquake-safe. Earthquake bars are installed in the library reference and reserve book collections, to prevent books from falling off high shelves in the event of an earthquake.

**II.C.1.e. When the institution relies on or collaborates with other institutions or other sources for library and other learning support services for its instructional programs, it documents that formal agreements exist and that such resources and services are adequate for the institution’s intended purposes, are easily accessible, and utilized. The performance of these services is evaluated on a regular basis. The institution takes responsibility for and assures the reliability of all services provided either directly or through contractual arrangement.**

Descriptive Summary
Through the Community College Library Consortium (CCLC) of California, the SBVC library maintains subscriptions to the online database collections. Through this consortium, the college can expand its purchasing power by negotiating subscription rates at a reduced cost. Formal membership and agreement are in place for the consortia (5.17). The new library automation system, OCLC World Share Management, was purchased through the consortia. SBVC Library faculty and staff have been collaborating with faculty and staff at Crafton Hills Library, Valley’s sister campus, to bring up this new shared library system. Inter-library loans of book materials
are offered between the two campuses and the students are welcome at each campus library to use the materials and facilities (5.18).

SBVC Library faculty partnered with the Basic Skills committee to purchase two online databases with emphasis on Basic Skills. English Language Learning is a multipurpose information resource which includes articles reference books and step-by-step guides for writing research papers is designed for students with lower reading levels or students new to the English language. The second databases, Learning Express Library, hosts tutorials, exercises, skill-building courses and practices tests for Reading Comprehension, Vocabulary, Spelling, Grammar, Math and College Placement Test preparation. Two of the Reading and English faculty are piloted these databases in Fall 2013. The report [Evidence] to the Basic Skills Committee showed that:

“Based on the personal testimony as well as a rough grade comparison between the two semesters, it indicates that there may be a correlation between increased student performance and the use of the Learning Express and ELL database programs. However, between these two programs, the ELL database program seems to be more applicable for the skill level of ESL 931 students.”

Based on the report, the Basic Skills Committee continued to sponsor the English Language Learner and Learning Resource Center for another year.

Self-Evaluation
The institution meets the standard. Membership in the consortium allows the library to purchase subscriptions to electronic information at reduced costs in a joint buying venture with all community colleges in California. The consortium also includes a product-review committee that evaluates information resources and makes recommendations about potential subscriptions. In addition, the SBVC-CHC partnership provides additional support, allowing full access for students to all the resources, no matter where they are enrolled.

Actionable Improvement Plan
Conduct a follow up study of second year partnerships with Reading and English faculty and basic skills databases. Explore the use of English Language Learner and Learning Express Library across campus disciplines.

**II.C.2. The institution evaluates library and other learning support services to assure their adequacy in meeting identified student needs. Evaluation of these services provides evidence that they contribute to the achievement of student learning outcomes. The institution uses the results of these evaluations as the basis for improvement.**

Descriptive Summary
The Library and Academic Advancement faculty have discussed the creation, implementation, and assessment of course-and program-level SLOs and SAOs and the role they will play in the evaluative process of program services. The library faculty meet weekly, whenever possible, during the fall and spring semesters to discuss the previous week’s activities, plan for the coming week, and other topics including collection development, BI sessions, curriculum, assessment and assignments, SAOs and SLOs to ensure that services are meeting identified student needs.
The college evaluates and improves the library and learning support systems through the use of several different assessments. The Library evaluates the effectiveness of its bibliographic instruction (BI) sessions and open workshops with immediate feedback from students and faculty gained by in-class worksheets.

SAOs for all Library and campus Learning Support Services are available on the Vice President of Instruction’s website. All areas have identified ongoing assessment tools and collect SAO data every semester. All Library and Learning Support areas not affiliated with instructional divisions underwent SAO evaluation during Spring 2014. Prior SAO evaluations are reported in the Student Learning Outcomes executive summaries also located on the VPI’s website. SAOs are currently evaluated on a three-year cycle and all areas will be evaluated during or prior to Spring 2017.

Library and campus LSS areas participate fully in the campus program review process. The program efficacy processes conducted by the Program Review Committee was completed every three years prior to 2013-2014 and now occurs every four years. Program efficacy is inclusive of SAOs and holds departments accountable for the currency of SAOs and SAO analysis. The Library and Library Computer Lab was evaluated in 2011 and received the committee’s highest recommendation.

The Campus Climate survey provides feedback on library and LSS services from students, staff, faculty and administrators.

**Self-Evaluation**

The institution meets the standard. The Library and campus Learning Support Services participate in Program Review which includes an annual needs assessment. The department uses feedback from the needs assessment to evaluate division services and make procedural changes. For instance, after the 2007 needs assessment, library faculty began to track the number of reference interactions with students, readjusted the number of librarians required to address students' questions at the reference desk, and scheduled more librarians at peak times.

All Learning Support areas undergo an individual program efficacy, or are reviewed in context of the parent department. For example, the Writing Center is evaluated in conjunction with the English department and the Health Science and Nursing Resource Center is evaluated with the Nursing Department. Program efficacy results are reported at Academic Senate and College Council. Program efficacy documents can be reviewed on the Program Review Committees website.
Data collected from the Campus Climate Survey over several years indicates that with the exception of hours, faculty and students are satisfied with library resources and services.
